Email: borashivam7@gmail.com | Phone: 7240545563 | GitHub: github.com/shivambora | Location: Jaipur, India

PROFESSIONAL SUMMARY

Computer Science final year student graduating in 2026 with hands-on experience in full stack development and AI-native engineering. Proficient in building RAG pipelines, agentic workflows, and LLM-integrated applications. Experienced with Java, JavaScript, React.js, Node.js, LangChain, LangGraph, and FastAPI. Passionate about AI agents and the future of software engineering.

EDUCATION

Bachelor of Technology in Computer Science 2022 - 2026
SKIT - NBA Accredited College, Jaipur, India

Higher Secondary - 12th Grade 2022
MPS Pratap Nagar, Jaipur, India

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, C++, HTML5, SQL
AI and LLM: Large Language Models, RAG Pipelines, Prompt Engineering, Structured Outputs, LangChain, LangGraph, Agentic Workflows, Tool Orchestration, LLM Integration, Embeddings
Web and Full Stack: React.js, Node.js, Express.js, REST APIs, Socket.IO, TailwindCSS, Vite, DaisyUI
Cloud and DevOps: Git, GitHub, CI/CD Pipelines, AWS, Docker, Containers
AI Evaluation and Ops: AI Quality Validation, Hallucination Detection, Monitoring, Guardrails, Fallback Strategies
Tools and Platforms: FastAPI, Streamlit, Vector Databases, Visual Studio Code, Figma, Zustand
Soft Skills: Leadership, Communication, Attention to Detail, Adaptability, Cross Functional Collaboration

PROJECTS

AI-Powered Document Q&A Chatbot - RAG Pipeline 2026
Python, LangChain, OpenAI API, FastAPI, Streamlit, Vector Database, Prompt Engineering

- Built an end-to-end retrieval augmented generation pipeline that ingests PDF and text documents, generates embeddings, stores them in a vector database, and retrieves grounded context for LLM-powered question answering.
- Designed structured prompt templates and tool-calling patterns to produce reliable, production-grade outputs with reduced hallucination and improved response accuracy.
- Implemented AI quality guardrails including output validation, hallucination detection, and fallback strategies aligned with responsible AI practices.
- Delivered an interactive demo via Streamlit and a FastAPI backend, replicating short-cycle proof of concept delivery for enterprise AI engagements.

AI Research Agent - Agentic Workflow with Tool Orchestration 2026
Python, LangChain, LangGraph, OpenAI API, Tool Calling, FastAPI, Streamlit

- Built a multi-tool LangChain agent that autonomously decides which tools to invoke including web search, calculator, and file reader to resolve complex queries end-to-end.
- Designed tool-calling patterns and structured output schemas so the agent returns consistent, validated JSON responses ready for downstream consumption.
- Implemented an agentic reasoning loop using LangGraph covering plan, act, observe, and retry cycles demonstrating agentic system design beyond simple prompt and response flows.
- Exposed the agent via a FastAPI endpoint with a Streamlit frontend for live client-facing proof of concept demos.

Real-Time Chat Application - VIBECAT June 2025
React.js, Node.js, Express, Socket.IO, JWT, Zustand, TailwindCSS, DaisyUI, Vite

- Built a production-ready full-stack real-time chat application with instant messaging, live user status, and a responsive UI with complete build optimisation and deployment readiness.
- Engineered a secure REST API authentication system using JWT-based login and logout, cookie handling, and protected routes demonstrating secure by design engineering practices.
- Managed global state with Zustand and optimised WebSocket delivery via Socket.IO for low-latency real-time communication at scale.
